

WHY CHOOSE

**SPRU
SYSTEMS** *inc.*

We Have A Long Standing Custom At

Spray Systems

WE BUILD BOOTHS

THE RIGHT WAY

FOR ALL THE RIGHT REASONS

Who is *Spray Systems* ?

Founded in 1977—35 years of proven experience

Our business focus is, designing and manufacturing spray booths and major components for industrial finishing systems for customers all over the world

Choosing *Spray Systems Means...*

- Exactly the Right Product to Fit Your Needs
- Experienced Engineering
- Local Distributor Support

Assistance with booth design selection,
regulatory codes and installation

- Premium Materials For Durability
and more...

Built To Last

Precise— CNC manufacturing means precise hole-positioning for easy bolting and panels that fit squarely together

Quality appearance— with durable premium grade G-90 galvanized steel

Durable—Nut and bolt assembly with panels punched 6" on centers

Quick assembly— Panels precision fit, even for the most complex booth designs.

Efficient-Effective lighting

Uniform lighting—With 4-tube fixtures to illuminate evenly

Cost efficient—T-8 type fixtures reduce power cost by 20%

Easy mounting—Light panels with framed openings

Industrial Rated—With dust tight seals

Meets booth code requirements—
UL/ETL approved and labeled

Efficient-Effective lighting

Uniform Light Dispersion

Quiet-High Performance Exhaust Fans

Quiet—Typically operates at low noise levels below the OSHA limits. Some competitive fans operate as high as 105 DBA. We have engineered fans as quiet as 64 dba for custom booths.

Efficient—Computer selected for optimum performance at lowest possible fan blade speed

Dependable—High efficiency, TRI-voltage, TEFC motor

Quality—Designed and manufactured in-house; for easy installation, motor and drives ship pre-assembled.

Designed for Faster Installation

- Fans pre-assembled with drives
- Integral formed steel supports
- Nut and bolt assembly
- Adjustable base angles compensate for pitched building floor - reduces grouting

Four-sided Panels Mean Fewer Parts to Assemble

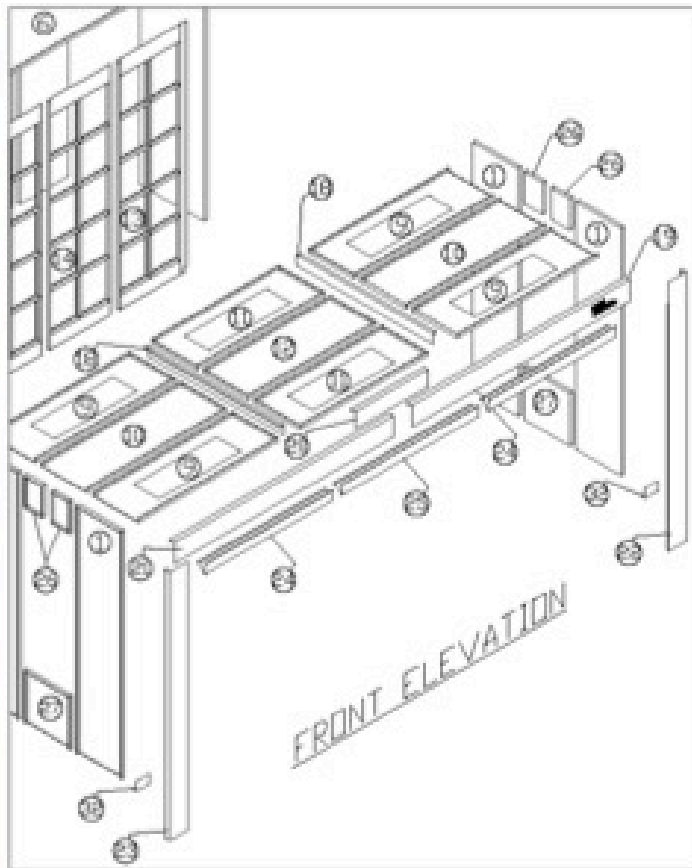

- Panels with flanges on all four sides mean fewer parts to assemble and eliminates tie-in angles required with two-sided panels
- Speeds Installation
- Provides a More Rigid Structure

Faster Installation

SIZE: 36 X 48

Integrated Steel Design

Formed support steel structure—Made from rigid galvanized, heavy gauge steel

CNC punched—to precisely align holes with corresponding panels

Ease of assembly—Designed to easily bolt between panel flanges

Monolithic—Provides smooth booth interior for a cleaner booth environment

Installer Comments:

INSTALLER COMMENTS:

“Over the past 5 years we have installed over 50 of your custom engineered products and with SSI booths everything fits. Bolt holes line up, panels are correct size, door openings are square and the adjustable floor angles are a brilliant idea. When we are finished with the installation, Spray Systems booths have that fit and finish we look for”.

Tom Hansen - *Thomas Industries, Redmond, WA*

“My installer has assembled lots of booths and yours are the best quality he has ever seen”

Jay Richardson - *Air Mechanical Sales, Lexington, KY*

Products For Every Market

Spray Systems booths are used by manufacturers of virtually every conceivable product

- ✓ from RV's to flat-screen HDTV's
- ✓ from golf balls to 60,000 pound buoys
- ✓ from jet aircraft to jet spas,
- ✓ and the list goes on.....

Kenworth	large trucks
Fleetwood	motor homes
Gould Pumps	industrial pumps

User Comments

0261 COMMENTS

- *“Our painters rave about these booths and we’ve achieved better quality finishes than ever before”*
Paul Sackos – B.F. Goodrich Aerospace, Chula Vista, CA
- *“Our experience has been totally satisfactory: the air flow is great, the booth is quieter than others in our plant, hardly any maintenance required and we’re achieving excellent finish quality” Better yet, the whole transaction was handled quickly and smoothly!”*
Jeff Gillette, Plant Engineer, Ethan Allen, Inc.
- *“Monaco Coach in Oregon and Indiana wouldn’t buy spray booths from anyone else. You can’t beat Spray Systems quality”*

Dennis Taylor – Industrial Finishes & Systems, Eugene, OR
